

Chris Burgoyne Earns Software Tester Certification from QAI

Blacksburg, VA, November 20, 2006

Vision Point Systems (VPS) announced today that Chris Burgoyne, QA Manager, has passed the CSTE exam administered by the **Quality Assurance Institute (QAI)**. The **Certified Software Tester (CSTE)** certification is recognized as an established standard for initial qualification and provides professional direction for quality assurance personnel through an aggressive educational program. Acquiring the designation of Certified Software Tester (CSTE) indicates a professional level of competence in the principles and practices of quality control in the IT profession. CSTE's are members of a recognized professional group and receive recognition from business and professional associates.

Vision Point Systems specializes in software engineering in the converged communications space, creating interactive response applications to serve government and industry.

We maintain high standards for requirements gathering, documentation, software and systems design, customer support, and **validation**. Our solutions are now used everyday in regulated environments to distribute life-saving and life-enhancing drugs. We design, develop, and deploy telephony and web-based tools to meet complex and unique business requirements. Whether you need to gather clinical trial data, maintain strict control over drug distribution, or enhance the efficiency of a contact center, Vision Point Systems has the experience to deliver reliable solutions.
