

Vision Point Systems Fairfax Office Relocates to New Facility

Blacksburg, VA, January 1, 2007

Vision Point Systems (VPS) announced today it has opened a new office in Fairfax, Virginia at **10201 Lee Highway, Suite 225**, and no longer will maintain our office at **3915 Old Lee Highway**. VPS moved to accommodate its growing staff and better serve our clients. Please stop by and see our new offices!

Vision Point Systems began its corporate life serving the pharmaceutical industry. Providing application development, systems integration, and infrastructure support services for managed drug distribution systems. Our project managers and IT professionals understand the challenges unique to a FDA-regulated environment. Since then, Vision Point Systems has established itself as a government contractor. We are proud to say that our company is SBA-8(a) certified by the United States Federal Government's Small Business Association. We are also part of a HUBZone - a historically underutilized business zone.

We maintain high standards for requirements gathering, documentation, software and systems design, validation, and customer support. Our solutions are now used everyday in regulated environments to distribute life-saving and life-enhancing drugs. We design, develop, and deploy telephony and web-based tools to meet complex and unique business requirements. Whether you need to gather clinical trial data, maintain strict control over drug distribution, or enhance the efficiency of a contact center, Vision Point Systems has the experience to deliver reliable solutions.
